Molecule–radiation and molecule–molecule processes in condensed media: a microscopic QED theory, G. Juzeliūnas 198 (1995) 145

Many body and quasiparticle approaches

On the theory of Frenkel excitonic polarons, J. Singh 198 (1995) 63

Molecular polaron states in polyacene crystals. Formation and transfer processes, E.A. Silinsh, A. Klimkāns, S. Larsson and V. Čápek 198 (1995) 311

Coupling schemes and perturbative treatments

Nonlinear optical vibrations in organic superlattices with interface Fermi resonance, V.M. Agranovich, O.A. Dubovsky and A.M. Kamchatnov 198 (1995) 245

Relativistic quantum mechanics

Ab initio CI study of the electronic spectrum of bismuth iodide employing relativistic effective core potentials, A.B. Alekseyev, K.K. Das, H.-P. Liebermann, R.J. Buenker and G. Hirsch 198 (1995) 333

Transport quantum mechanics

On the theory of Frenkel excitonic polarons, J. Singh 198 (1995) 63

Molecular polaron states in polyacene crystals. Formation and transfer processes, E.A. Silinsh, A. Klimkāns, S. Larsson and V. Čápek 198 (1995) 311

Statistical mechanics of stationary states
An analytical study of the Berezhkovskii–Pollak–Zitserman theory of rate processes in the memory-suppression region, S. Singh and G.W. Robinson 198 (1995) 257

Ab initio schemes for stationary properties
Molecular interactions: a study of charge transfer effects, C. Amovilli and R. McWeeny 198 (1995) 71
The electronic spectrum of phthalazine. Theory and experiment, G. Fischer and P. Wormell 198 (1995) 183
Ab initio CI study of the electronic spectrum of bismuth iodide employing relativistic effective core potentials, A.B. Alekseyev, K.K. Das, H.-P. Liebermann, R.J. Buenker and G. Hirsch 198 (1995) 333
SCF and electron correlation studies on structure, force constants and vibrational spectra of borane monoammoniate complex, A. Vijay and D.N. Sathyanarayana 198 (1995) 345

Computational and simulation methods
Temperature dependence of the thermal conductivity for two models of liquid butane, P.J. Daivis and D.J. Evans 198 (1995) 25
Molecular dynamics simulation of the adsorption of benzene on charged metal electrodes in the presence of aqueous electrolyte, M.R. Philpott and J.N. Glosli 198 (1995) 53
Pressure and temperature effects in lattice dynamics: the case of naphthalene, R.G. Della Valle, E. Venuti and A. Brillante 198 (1995) 79
The harmonic two-colour rotating wave approximation; its validity and an application to the effects of permanent dipoles and laser phase in molecular excitations, A. Brown and W.J. Meath 198 (1995) 91
Ab initio study of the cyclic isomers of N_2S_4, G.S. Chandler, D. Jayatilaka and M. Wajrak 198 (1995) 169
Tunneling splittings in model 2D potentials. III. $V(X, Y) = \lambda(X^2 - X_0^2)^2 - CXY + \frac{1}{2}kY^2 + (C^2/2k)X^2$. Generalization to N-dimensional case, V.A. Benderskii, S.Yu. Grebenshchikov and G.V. Mil'nikov 198 (1995) 281
Orientation factor in Förster energy transfer with photoselection of donor and acceptor, B. Nickel 198 (1995) 353

Molecular dynamics and scattering theory
Molecular dynamics simulation of the adsorption of benzene on charged metal electrodes in the presence of aqueous electrolyte, M.R. Philpott and J.N. Glosli 198 (1995) 53
Electron control in photodissociation by two-color multiphoton processes, A.D. Bandrauk and E.E. Aubanel 198 (1995) 159
Classical dynamics of vibrational-translational energy transfer in linear collisions of an atom and a diatomic molecule/anharmonic oscillator, O.V. Skrebkov and A.L. Smirnov 198 (1995) 297

Experimental

Microwave spectroscopy
Pre-chemical interactions in a pulsed jet: the angular geometry of thiirane $\cdots$ HCl and the nonlinearity of its hydrogen bond from rotational spectroscopy, C.M. Evans and A.C. Legon 198 (1995) 119

Infrared spectroscopy
Generation of transient species by laser induced pyrolysis. The high resolution Fourier transform infrared spectrum of NCN, D. McNaughton, G.F. Metha and R. Tay 198 (1995) 107

ıman spectroscopy
)larisation analysis of bimolecular excitations mediated by energy transfer: A common theoretical framework for fluorescence migration and sequential Raman scattering, D.L. Andrews and P. Allcock 198 (1995) 35

'sible and UV spectroscopy
ıe electronic spectrum of phthalazine. Theory and experiment, G. Fischer and P. Wormell 198 (1995) 183

'uorescence spectroscopy
)larisation analysis of bimolecular excitations mediated by energy transfer: A common theoretical framework for fluorescence migration and sequential Raman scattering, D.L. Andrews and P. Allcock 198 (1995) 35

ıser methods
ibrational sidelines in the localized ^{3}MLCT luminescence of $[Ru(bpy)_{3-x}(L)_x]^{2+}$ ($x = 0$ to 3, L = 3,3′-bipyridazine, bpy-d_8) in the C2/c $[Zn(bpy)_3](ClO_4)_2$ lattice, H. Riesen, L. Wallace and E. Krausz 198 (1995) 269

icosecond spectroscopy
cosecond time-dependent Stokes shift studies of fluoroprobe in liquid solution, E.R. Middelhoek, P. van der Meulen, J.W. Verhoeven and M. Glasbeek 198 (1995) 373

ınchrotron spectroscopies
study of the absolute photoabsorption, photoionisation and photodissociation cross sections and the photoionisation quantum efficiency of carbon dioxide from the ionisation threshold to 345 Å, D.A. Shaw, D.M.P. Holland, M.A. Hayes, M.A. MacDonald, A. Hopkirk and S.M. McSweeney 198 (1995) 381

ime-resolved experiments
hiral discrimination in electronic energy-transfer processes in solution. Effects of temperature and solution properties on chirality-dependent rate parameters, D.P. Glover-Fischer, D.H. Metcalf, J.P. Bolender and F.S. Richardson 198 (1995) 207
icosecond time-dependent Stokes shift studies of fluoroprobe in liquid solution, E.R. Middelhoek, P. van der Meulen, J.W. Verhoeven and M. Glasbeek 198 (1995) 373

-ray, electron and neutron diffraction
EED crystallographic determination for the restructured surface formed by phosphorus bonded at Cu(110), W. Liu, D.T. Vu and K.A.R. Mitchell 198 (1995) 235

Objects

ulk systems

'ases
he electronic spectrum of phthalazine. Theory and experiment, G. Fischer and P. Wormell 198 (1995) 183
'lassical dynamics of vibrational-translational energy transfer in linear collisions of an atom and a diatomic molecule/anharmonic oscillator, O.V. Skrebkov and A.L. Smirnov 198 (1995) 297

Liquids neat
Temperature dependence of the thermal conductivity for two models of liquid butane, P.J. Daivis and D.J. Evans 198 (1995) 25
An analytical study of the Berezhkovskii–Pollak–Zitserman theory of rate processes in the memory-suppression region, S. Singh and G.W. Robinson 198 (1995) 257

Liquid mixtures and solutions
Chiral discrimination in electronic energy-transfer processes in solution. Effects of temperature and solution properties on chirality-dependent rate parameters, D.P. Glover-Fischer, D.H. Metcalf, J.P. Bolender and F.S. Richardson 198 (1995) 207

Crystals
Molecular polaron states in polyacene crystals. Formation and transfer processes, E.A. Silinsh, A. Klimkāns, S. Larsson and V. Čápek 198 (1995) 311

-neat
Pressure and temperature effects in lattice dynamics: the case of naphthalene, R.G. Della Valle, E. Venuti and A. Brillante 198 (1995) 79

-mixed
Vibrational sidelines in the localized ^{3}MLCT luminescence of $[Ru(bpy)_{3-x}(L)_x]^{2+}$ ($x = 0$ to 3, L = 3,3′-bipyridazine, bpy-d_8) in the C2/c $[Zn(bpy)_3](ClO_4)_2$ lattice, H. Riesen, L. Wallace and E. Krausz 198 (1995) 269

Polymers
Gauge invariant formulation of molecular electrodynamics and the multipolar Hamiltonian, V. Chernyak and S. Mukamel 198 (1995) 133

Semiconductors
On the theory of Frenkel excitonic polarons, J. Singh 198 (1995) 63
Gauge invariant formulation of molecular electrodynamics and the multipolar Hamiltonian, V. Chernyak and S. Mukamel 198 (1995) 133

Surfaces
Molecular dynamics simulation of the adsorption of benzene on charged metal electrodes in the presence of aqueous electrolyte, M.R. Philpott and J.N. Glosli 198 (1995) 53
LEED crystallographic determination for the restructured surface formed by phosphorus bonded at Cu(110), W. Liu, D.T. Vu and K.A.R. Mitchell 198 (1995) 235
Nonlinear optical vibrations in organic superlattices with interface Fermi resonance, V.M. Agranovich, O.A. Dubovsky and A.M. Kamchatnov 198 (1995) 245

Dielectrics
Molecule–radiation and molecule–molecule processes in condensed media: a microscopic QED theory, G. Juzeliūnas 198 (1995) 145

Microscopic systems

Atoms
Relativistic causality and quantum-mechanical states in the Fermi problem, G. Compagno, G.M. Palma, R. Passante and F. Persico 198 (1995) 19

Molecules (neutral and ionic)
The harmonic two-colour rotating wave approximation; its validity and an application to the effects of permanent dipoles and laser phase in molecular excitations, A. Brown and W.J. Meath 198 (1995) 91

-diatomic
Classical dynamics of vibrational-translational energy transfer in linear collisions of an atom and a diatomic molecule/anharmonic oscillator, O.V. Skrebkov and A.L. Smirnov 198 (1995) 297
Ab initio CI study of the electronic spectrum of bismuth iodide employing relativistic effective core potentials, A.B. Alekseyev, K.K. Das, H.-P. Liebermann, R.J. Buenker and G. Hirsch 198 (1995) 333

-small polyatomics
Generation of transient species by laser induced pyrolysis. The high resolution Fourier transform infrared spectrum of NCN, D. McNaughton, G.F. Metha and R. Tay 198 (1995) 107
Ab initio study of the cyclic isomers of N_2S_4, G.S. Chandler, D. Jayatilaka and M. Wajrak 198 (1995) 169
SCF and electron correlation studies on structure, force constants and vibrational spectra of borane monoammoniate complex, A. Vijay and D.N. Sathyanarayana 198 (1995) 345
A study of the absolute photoabsorption, photoionisation and photodissociation cross sections and the photoionisation quantum efficiency of carbon dioxide from the ionisation threshold to 345 Å, D.A. Shaw, D.M.P. Holland, M.A. Hayes, M.A. MacDonald, A. Hopkirk and S.M. McSweeney 198 (1995) 381

-aromatics
The electronic spectrum of phthalazine. Theory and experiment, G. Fischer and P. Wormell 198 (1995) 183
Orientation factor in Förster energy transfer with photoselection of donor and acceptor, B. Nickel 198 (1995) 353

-other large
Chiral discrimination in electronic energy-transfer processes in solution. Effects of temperature and solution properties on chirality-dependent rate parameters, D.P. Glover-Fischer, D.H. Metcalf, J.P. Bolender and F.S. Richardson 198 (1995) 207
Tunneling splittings in model 2D potentials. III. $V(X, Y) = \lambda(X^2 - X_0^2)^2 - CXY + \frac{1}{2}kY^2 + (C^2/2k)X^2$. Generalization to N-dimensional case, V.A. Benderskii, S.Yu. Grebenshchikov and G.V. Mil'nikov 198 (1995) 281

Molecular aggregates
Gauge invariant formulation of molecular electrodynamics and the multipolar Hamiltonian, V. Chernyak and S. Mukamel 198 (1995) 133

-dimers
Molecular interactions: a study of charge transfer effects, C. Amovilli and R. McWeeny 198 (1995) 71
Pre-chemical interactions in a pulsed jet: the angular geometry of thiirane · · · HCl and the nonlinearity of its hydrogen bond from rotational spectroscopy, C.M. Evans and A.C. Legon 198 (1995) 119

-van der Waals molecules
Molecular interactions: a study of charge transfer effects, C. Amovilli and R. McWeeny 198 (1995) 71
Pre-chemical interactions in a pulsed jet: the angular geometry of thiirane · · · HCl and the nonlinearity of its hydrogen bond from rotational spectroscopy, C.M. Evans and A.C. Legon 198 (1995) 119

Tunneling splittings in model 2D potentials. III. $V(X, Y) = \lambda(X^2 - X_0^2)^2 - CXY + \frac{1}{2}kY^2 + (C^2/2k)X^2$. Generalization to N-dimensional case, V.A. Benderskii, S.Yu. Grebenshchikov and G.V. Mil'nikov 198 (1995) 281

Free radicals (including hydronium and muonium)

Generation of transient species by laser induced pyrolysis. The high resolution Fourier transform infrared spectrum of NCN, D. McNaughton, G.F. Metha and R. Tay 198 (1995) 107

Quasiparticles (including excitons)

Molecular polaron states in polyacene crystals. Formation and transfer processes, E.A. Silinsh, A. Klimkāns, S. Larsson and V. Čápek 198 (1995) 311

Ions and charge carriers

Molecular dynamics simulation of the adsorption of benzene on charged metal electrodes in the presence of aqueous electrolyte, M.R. Philpott and J.N. Glosli 198 (1995) 53

Phenomena

Molecular structure

Pre-chemical interactions in a pulsed jet: the angular geometry of thiirane · · · HCl and the nonlinearity of its hydrogen bond from rotational spectroscopy, C.M. Evans and A.C. Legon 198 (1995) 119

Ab initio study of the cyclic isomers of N_2S_4, G.S. Chandler, D. Jayatilaka and M. Wajrak 198 (1995) 169

SCF and electron correlation studies on structure, force constants and vibrational spectra of borane monoammoniate complex, A. Vijay and D.N. Sathyanarayana 198 (1995) 345

Vibrations and rotations of molecules

Generation of transient species by laser induced pyrolysis. The high resolution Fourier transform infrared spectrum of NCN, D. McNaughton, G.F. Metha and R. Tay 198 (1995) 107

Vibrational sidelines in the localized ^{3}MLCT luminescence of $[Ru(bpy)_{3-x}(L)_x]^{2+}$ ($x = 0$ to 3, L = 3,3′-bipyridazine, bpy-d_8) in the C2/c $[Zn(bpy)_3](ClO_4)_2$ lattice, H. Riesen, L. Wallace and E. Krausz 198 (1995) 269

SCF and electron correlation studies on structure, force constants and vibrational spectra of borane monoammoniate complex, A. Vijay and D.N. Sathyanarayana 198 (1995) 345

Electronic structure and states

The electronic spectrum of phthalazine. Theory and experiment, G. Fischer and P. Wormell 198 (1995) 183

Vibrational sidelines in the localized ^{3}MLCT luminescence of $[Ru(bpy)_{3-x}(L)_x]^{2+}$ ($x = 0$ to 3, L = 3,3′-bipyridazine, bpy-d_8) in the C2/c $[Zn(bpy)_3](ClO_4)_2$ lattice, H. Riesen, L. Wallace and E. Krausz 198 (1995) 269

Ab initio CI study of the electronic spectrum of bismuth iodide employing relativistic effective core potentials, A.B. Alekseyev, K.K. Das, H.-P. Liebermann, R.J. Buenker and G. Hirsch 198 (1995) 333

A study of the absolute photoabsorption, photoionisation and photodissociation cross sections and the photoionisation quantum efficiency of carbon dioxide from the ionisation threshold to 345 Å, D.A. Shaw, D.M.P. Holland, M.A. Hayes, M.A. MacDonald, A. Hopkirk and S.M. McSweeney 198 (1995) 381

Optical activity
Nonlinear optical vibrations in organic superlattices with interface Fermi resonance, V.M. Agranovich, O.A. Dubovsky and A.M. Kamchatnov 198 (1995) 245

Molecular interactions
Two- and three-body dispersion forces with one excited molecule, E.A. Power and T. Thirunamachandran 198 (1995) 5
Polarisation analysis of bimolecular excitations mediated by energy transfer: A common theoretical framework for fluorescence migration and sequential Raman scattering, D.L. Andrews and P. Allcock 198 (1995) 35
Molecular interactions: a study of charge transfer effects, C. Amovilli and R. McWeeny 198 (1995) 71
Pre-chemical interactions in a pulsed jet: the angular geometry of thiirane · · · HCl and the nonlinearity of its hydrogen bond from rotational spectroscopy, C.M. Evans and A.C. Legon 198 (1995) 119

Spectral bandshapes and intensities
Ab initio CI study of the electronic spectrum of bismuth iodide employing relativistic effective core potentials, A.B. Alekseyev, K.K. Das, H.-P. Liebermann, R.J. Buenker and G. Hirsch 198 (1995) 333

Coupling of electronic and nuclear motion
Picosecond time-dependent Stokes shift studies of fluoroprobe in liquid solution, E.R. Middelhoek, P. van der Meulen, J.W. Verhoeven and M. Glasbeek 198 (1995) 373

Energy transfer processes
Relativistic causality and quantum-mechanical states in the Fermi problem, G. Compagno, G.M. Palma, R. Passante and F. Persico 198 (1995) 19
Polarisation analysis of bimolecular excitations mediated by energy transfer: A common theoretical framework for fluorescence migration and sequential Raman scattering, D.L. Andrews and P. Allcock 198 (1995) 35
Chiral discrimination in electronic energy-transfer processes in solution. Effects of temperature and solution properties on chirality-dependent rate parameters, D.P. Glover-Fischer, D.H. Metcalf, J.P. Bolender and F.S. Richardson 198 (1995) 207
Classical dynamics of vibrational-translational energy transfer in linear collisions of an atom and a diatomic molecule/anharmonic oscillator, O.V. Skrebkov and A.L. Smirnov 198 (1995) 297
Orientation factor in Förster energy transfer with photoselection of donor and acceptor, B. Nickel 198 (1995) 353
Picosecond time-dependent Stokes shift studies of fluoroprobe in liquid solution, E.R. Middelhoek, P. van der Meulen, J.W. Verhoeven and M. Glasbeek 198 (1995) 373

Molecular photophysical processes
Polarisation analysis of bimolecular excitations mediated by energy transfer: A common theoretical framework for fluorescence migration and sequential Raman scattering, D.L. Andrews and P. Allcock 198 (1995) 35
The harmonic two-colour rotating wave approximation; its validity and an application to the effects of permanent dipoles and laser phase in molecular excitations, A. Brown and W.J. Meath 198 (1995) 91

Molecule–radiation and molecule–molecule processes in condensed media: a microscopic QED theory, G. Juzeliūnas 198 (1995) 145

A study of the absolute photoabsorption, photoionisation and photodissociation cross sections and the photoionisation quantum efficiency of carbon dioxide from the ionisation threshold to 345 Å, D.A. Shaw, D.M.P. Holland, M.A. Hayes, M.A. MacDonald, A. Hopkirk and S.M. McSweeney 198 (1995) 381

Luminescence spectra, yields and lifetimes

Molecule–radiation and molecule–molecule processes in condensed media: a microscopic QED theory, G. Juzeliūnas 198 (1995) 145

Chiral discrimination in electronic energy-transfer processes in solution. Effects of temperature and solution properties on chirality-dependent rate parameters, D.P. Glover-Fischer, D.H. Metcalf, J.P. Bolender and F.S. Richardson 198 (1995) 207

Vibrational sidelines in the localized ^{3}MLCT luminescence of $[Ru(bpy)_{3-x}(L)_x]^{2+}$ ($x = 0$ to 3, L = 3,3′-bipyridazine, bpy-d_8) in the C2/c $[Zn(bpy)_3](ClO_4)_2$ lattice, H. Riesen, L. Wallace and E. Krausz 198 (1995) 269

Non-linear responses (including optical)

The harmonic two-colour rotating wave approximation; its validity and an application to the effects of permanent dipoles and laser phase in molecular excitations, A. Brown and W.J. Meath 198 (1995) 91

Multiphoton phenomena

The harmonic two-colour rotating wave approximation; its validity and an application to the effects of permanent dipoles and laser phase in molecular excitations, A. Brown and W.J. Meath 198 (1995) 91

Electron control in photodissociation by two-color multiphoton processes, A.D. Bandrauk and E.E. Aubanel 198 (1995) 159

Reactions (including dissociation)

-gas phase

Generation of transient species by laser induced pyrolysis. The high resolution Fourier transform infrared spectrum of NCN, D. McNaughton, G.F. Metha and R. Tay 198 (1995) 107

-condensed phase

An analytical study of the Berezhkovskii–Pollak–Zitserman theory of rate processes in the memory-suppression region, S. Singh and G.W. Robinson 198 (1995) 257

Tunnelling

Tunneling splittings in model 2D potentials. III. $V(X, Y) = \lambda(X^2 - X_0^2)^2 - CXY + \frac{1}{2}kY^2 + (C^2/2k)X^2$. Generalization to N-dimensional case, V.A. Benderskii, S.Yu. Grebenshchikov and G.V. Mil'nikov 198 (1995) 281

Electron transfer

Molecular interactions: a study of charge transfer effects, C. Amovilli and R. McWeeny 198 (1995) 71

Molecular polaron states in polyacene crystals. Formation and transfer processes, E.A. Silinsh, A. Klimkāns, S. Larsson and V. Čápek 198 (1995) 311

Molecular motion (including diffusive)
Picosecond time-dependent Stokes shift studies of fluoroprobe in liquid solution, E.R. Middelhoek, P. van der Meulen, J.W. Verhoeven and M. Glasbeek 198 (1995) 373

Collective motion and excitations
On the theory of Frenkel excitonic polarons, J. Singh 198 (1995) 63
Pressure and temperature effects in lattice dynamics: the case of naphthalene, R.G. Della Valle, E. Venuti and A. Brillante 198 (1995) 79

Surface effects and catalysis
Molecular dynamics simulation of the adsorption of benzene on charged metal electrodes in the presence of aqueous electrolyte, M.R. Philpott and J.N. Glosli 198 (1995) 53
LEED crystallographic determination for the restructured surface formed by phosphorus bonded at Cu(110), W. Liu, D.T. Vu and K.A.R. Mitchell 198 (1995) 235

Thermodynamic and transport properties
Temperature dependence of the thermal conductivity for two models of liquid butane, P.J. Daivis and D.J. Evans 198 (1995) 25

Structure of solids and liquids
Pressure and temperature effects in lattice dynamics: the case of naphthalene, R.G. Della Valle, E. Venuti and A. Brillante 198 (1995) 79

Phase transitions
Pressure and temperature effects in lattice dynamics: the case of naphthalene, R.G. Della Valle, E. Venuti and A. Brillante 198 (1995) 79
